----- Medical staff, in hospitals, nursing homes, etc., never stop asking for masks and means because face masks are unavailable neither for medical teams, nor for police, firefighters and even less in pharmacies. POLICE OFFICERS ARE ANGRY AS THEY HAVE NO GLOVES NOR FACE MASK TO PROTECT THEMSELVES---Officers are now allowed to wear a mask if "circumstances" "require", according to an internal memo. Since the start of confinement Tuesday, March 17, 2020, to fight against the coronavirus and the implementation of controls to enforce it, the national police have faced a sling led by their unions who claim the right to wear a mask for the agents because they are exposed to the risks of contamination (some infected cases in certain Paris police stations have them pushing to establish quarantines themselves!)-----

Already authorized to requisition respiratory protection masks stored or produced in France, the state can now seize all or part of imports of this type of product, according to a decree published today, Saturday, March 21, in the Official Journal.

"Stocks of imported masks can give rise to total or partial requisition until May 31, 2020," said this text. The coronavirus epidemic is advancing at high speed: worldwide, more than 167,414 people have been infected (81, 020 in China, 23, 980 in Italy, and 6,633 in France), and more than 6,507 have died (3,217 in China, 1811 in Italy, 148 in France). The National lockdown has been adopted in France was announced, since March 17th, announced the day before on Tv at 8pm, as he addressed the French Nation. Source : AFP, WHO
